

# COMPLETE ULTIMATE GROWLER

## Packing List

- 1 D53 Micro Regulator  
(attached to Q32 Ultimate Dispense Head)
- 1 I53 Ultimate Growler
- 1 B36 16 Gram CO2 Cartridge

## 1. Assembly

First remove the Growler lid by pulling the wire attached to the cap out so the hook is clear of the lower wire loop. Do this for both sides. Now

Upper hooks in loops ready to seal.

place the dispense head on the growler, and

pull the hook wire attached to the dispense head out until it pops into the lower wire loop. Do this for both sides so it looks like the above picture.

Now rinse thoroughly before

filling with beer.

## 2. Fill with beer and seal

2a. After filling the growler and sealing, the next step is to load the Micro Regulator with CO2.

2b. First turn the top knob of the Micro Regulator counterclockwise so 0 lines up with the arrow (this turns the gas off).

2c. Now screw the threaded CO2 cartridge in quickly until it is pierced and you hear hissing. Continue screwing quickly to avoid wasting CO2.

2d. Now, with the beer cold and the lid sealed, turn up the gas to a maximum of 5 PSI to dispense.

## 3. Dispensing and Cleanup

For best results dispense with the beer cold and keep the dispensing pressure at 5 PSI or less. A safety relief valve (the white nylon nut) will release pressure if you go over 8 PSI. After use, rinse thoroughly and leave open to dry. Open the black cobra beer tap after use and flush warm water through it to clean the beer line.

## 4. Versatility

The Micro Regulator includes a 74 gram CO2 cartridge adapter, so you can use larger cartridges as well as the popular 16 gram threaded cartridges. Install by unscrewing the 16 gram adapter from the base of the regulator, and screw the 74 gram adapter in tightly with a 7/8" wrench.

## WARNING!

- Keep CO2 cartridges away from temperatures over 110°F. or they may explode.

- Keep out of reach of children.

- Do not discharge Push Button Injector towards face or body.

- For use with CO2 cartridges only, not for use with high pressure nitrogen or argon cartridges.
